3M™ Scotchcal™ Dusted & Frosted Crystal Film Series 7725SE

3M Dusted & Frosted Crystal special effect films are the new way to create distinctive designs on glass. They are surprisingly affordable, unbelievably versatile and incredibly stylish. You can enhance your company's image with the classic style of etched or sand blasted glass – at a fraction of the cost. No matter how intricate your design, it's easy to reproduce text, logos and patterns using computer-aided cutting technology. The films can be applied to glass, acrylic or polycarbonate. The different colours and the dusted/frosted effects can be combined for added contrast and impact. Create a 3-dimensional look by applying designs on both sides of the glass. Scotchcal 7725SE films are warranted for indoor and outdoor use and can be used virtually anywhere, there's hardly an application you can't consider - long term decoration, corporate or safety markings and equally perfect for shorter-term promotional applications.

FAB Table

Features	Advantages	Benefits
Dusted & Frosted crystal durable translucent films	Dusted gives the appearance of etched glass Frosted gives the appearance of sand-blasted glass Can be applied to glass, acrylic or polycarbonate Suitable for interior and exterior applications Reproduce complex designs or simple lettering Designed for long term or short term durability Two sided application Visual awareness on clear glass windows and doors - manifestation Utilise as obscurity film	More economical than glass etching More economical than glass sand-blasting Choice of surface applications Durability and consistency of look throughout Versatile material Update your image without replacing costly glass Adds depth with the same appearance on each side Increases personal safety Provides needed personal privacy
Stylish patterns and colours	Increases the visual impact of your windows Uniform colour in both reflected and transmitted light	Creative opportunities Creates consistent designs for one site or an entire chain
Competitively priced	Affordable, quality range of window graphics	Less expensive solution than traditional glass etching and sand-blasting
Clear, pressure sensitive adhesive	Ensure graphics remain fixed in position	Guaranteed performance
Transparent synthetic liner	Allows for wet application and ease of weeding material	Easy on-site installation - no need to remove glass
Matt finish	Low gloss surface	Eliminates glare
Matched Component System (MCS) warranty	Strongest warranty in the industry. All elements designed for total compatibility	Peace of mind. Less risk of costly failure. No discrepancy over faulty elements of graphics
